

🌟 The Autonomous Hotel Operating System · Comprehensive Product Architecture

HospitalityOS

The complete, end-to-end platform engineered for independent hotels, boutique luxury resorts, and serviced apartments. From ground-level housekeeping tasks to autonomous AI general management.

TIER 1 · GROUND OPERATIONS

TIER 2 · GUEST OUTLETS & POS

TIER 3 · BACK-OF-HOUSE CONTROL

TIER 4 · FINANCE & REVENUE

TIER 5 · AI AUTONOMOUS BRAIN

How HospitalityOS is Structured: Small to Big

A progressive continuum connecting frontline micro-tasks directly to multi-property executive intelligence

TIER 5 · THE AI BRAIN

AI General Manager & WhatsApp Concierge · Natural language queries, automated upselling, reputation shield, multi-tenant group console.

TIER 4 · REVENUE & AUDIT

Financial Automation & Energy CPOR · Dynamic Virtual Accounts (DVA), automated night audit, 2-way OTA channel sync, generator fuel tracking.

TIER 3 · BACK-OF-HOUSE

Inventory, Recipes & Procurement · Ingredient-level recipe depletion, central store & cellar transfers, waste tracking, automated purchase orders.

TIER 2 · GUEST OUTLETS

Front Desk, CRM & Multi-Outlet POS · Visual tape chart rack, direct booking engine, restaurant/bar POS, Kitchen Display System (KDS), thermal receipt printing.

TIER 1 · MICRO-TASKS

Ground Operations & Staffing · Room status lifecycle, housekeeping room turns, maintenance work orders, geofenced clock-in, till shift balance.

Room Operations & Housekeeping Task Engine

Precision room status lifecycle and real-time mobile task dispatching for floor attendants

Room Lifecycle Engine

State machine governing every unit across the property.

- **Clean / Dirty Tracking:** Triggers automatically on guest checkout.
- **Inspected Status:** Supervisor sign-off required before front desk check-in.
- **Out of Order (OOO):** Blocks inventory from booking engines and rack.
- **Out of Service (OOS):** Temporary maintenance hold without inventory loss.

OPERATIONAL SPEED

-40% Room Turn Time

Housekeeper Task Board

Mobile-responsive cleaning board for housekeeping staff.

- **Priority Tagging:** Flags VIP arrivals and early check-ins.
- **Linen & Amenities Count:** Tracks bedsheet & towel turnover per room.
- **One-Tap Status Flip:** Attendant taps "Clean" → instantly notifies Front Desk.
- **Minibar Check-In:** Logs consumed snacks directly to guest folio.

ZERO DELAYS

Real-Time Desk Alerts

Keycard & Access Control

Frontline lock encoding and electronic access interfaces.

- **Encoder Integration:** Writes magnetic stripe & RFID cards at check-in.
- **Duration Locking:** Keycards expire automatically at 12:00 PM checkout.
- **Duplicate Key Safety:** Generates extra keys while retaining security logs.
- **Staff Master Pass:** Dedicated logs for housekeeping master access.

SECURITY

Zero Lock Drift

Maintenance Work Orders & Shift Cashiering

Fixing physical issues before guests notice, and ensuring every cent in the cash drawer is accounted for

Maintenance Work Orders

Dispatches repair tickets from rooms or common areas.

- **Severity Tiering:** Low, Medium, Urgent, and Emergency routing.
- **Asset Assignment:** Links issues to specific ACs, plumbing, or TV sets.
- **Resolution Time SLA:** Escalates unresolved issues to the General Manager.
- **Cost Tracking:** Records replacement parts cost for maintenance P&L.

ISSUE RESOLUTION

Under 35 Mins Avg

Cash Till & Shift Reconcile

Prevents cash pilferage during morning, afternoon & night shifts.

- **Opening Float Verification:** Receptionists count and confirm initial cash.
- **Petty Cash Drops:** Requires supervisor authorization for payouts.
- **Shift Blind Close:** Cashier enters physical cash without seeing expected sum.
- **Discrepancy Audit:** Overages and shortages logged into staff audit log.

CASH ACCOUNTABILITY

100% Shift Audit

Shift Handover Reports

Digital incident logs replacing paper desk logbooks.

- **Departmental Handovers:** Front Desk, Housekeeping, Bar & Security.
- **Pending Guest Follow-ups:** Flags flight delays, late requests, VIP wakeups.
- **Manager Review Feed:** General Manager can review all handover logs remotely.
- **Immutable Record:** Historical notes cannot be deleted or back-dated.

HANDOVERS

Zero Dropped Notes

Staff Attendance, Payroll & Gate Security

Eliminating buddy-punching via GPS geofencing, managing staff payroll, and logging gate visitors

Geofenced GPS Mobile Clock-In

Staff clock in and out from their own smartphones without biometric hardware.

- **100m Perimeter Lock:** Verifies device GPS against hotel coordinates.
- **Anti-Spoofing:** Flags mock location apps and virtual GPS emulators.
- **Punctuality Logs:** Marks arrivals as On-Time, Tardy, or Absent.
- **Zero Specialized Hardware:** Runs on any smartphone browser.

PAYROLL LEAKAGE PREVENTED
Zero Ghost Clock-Ins

Rostering, Leave & Payroll Advances

Comprehensive staff governance covering departments and compensation.

- **Department Segregation:** Front Office, F&B, Housekeeping, Security, Engineering.
- **Leave & PTO Workflow:** Staff submit time-off requests with manager approval.
- **Salary Advance Ledger:** Records mid-month emergency staff advances.
- **Role-Based Access (RBAC):** Granular permissions per staff tier.

LABOR GOVERNANCE
100% Shift Transparency

Gate Security & Visitor Management

Front gate perimeter protection and digital visitor badging.

- **Visitor Pass Logging:** Records visitor name, car plate, host guest, and time.
- **Checkout Verification:** Logs visitor departure time and badge return.
- **Security Incident Log:** Records perimeter breaches or noise complaints.
- **Guard Shift Handovers:** Digital handover notes between day & night guards.

PERIMETER SECURITY
100% Visitor Audit Trail

Interactive Visual Rack & Front Desk Engine

High-speed drag-and-drop room allocation calendar with 30-second check-in workflows

Interactive Tape Chart (Rack)

Multi-day visual grid displaying all property units in real time.

- **Drag-and-Drop Allocation:** Easily reassign rooms or extend guest stay dates.
- **Color-Coded Reservations:** Green (Confirmed), Blue (In-House), Orange (Unpaid).
- **One-Click Folio Launch:** Hover to see guest balance, phone, and source.
- **Bulk Availability View:** Instant visualization of sold vs. vacant units.

FRONT DESK SPEED

3x Faster Reallocation

Express Check-In & Walk-Ins

Rapid 30-second guest check-in optimized for busy arrival peaks.

- **Quick Room Selection:** Auto-filters only clean & inspected ready units.
- **Flexible Deposit Collection:** Cash, card, or instant bank transfer.
- **Digital Registration:** Eliminates paper registration cards and clipboards.
- **Group Booking Management:** Check in multiple tour rooms with a single click.

GUEST WAIT TIME

< 45 Seconds at Desk

Direct Web Booking Engine

Direct-to-guest booking engine hosted on hotel's own domain.

- **0% Commission:** Eliminate 18–25% OTA cuts on direct reservations.
- **Mobile-Optimized UI:** Seamless room selection with photo carousels.
- **Promo Code Field:** Applies corporate or seasonal flash discounts.
- **Instant Deposit Gateways:** Paystack, Flutterwave, and card processing.

DIRECT REVENUE

+28% Direct Bookings

Guest CRM, Loyalty Rewards & Compliance

Building rich guest profiles, automated loyalty point rewards, and lawful identity verification

Unified Guest Master CRM

Centralizes guest identity across all past visits and outlets.

- **Lifetime Spend Tracking:** Shows total spent across Rooms, Dining, and Bar.
- **Historical Stay Log:** Every past check-in date, room, and rate paid.
- **Contact Deduplication:** Merges duplicate records by phone and email.
- **Corporate Tagging:** Associates guests with company billing accounts.

RETENTION DRIVER

Complete Guest History

Loyalty Points & VIP Preferences

Rewards repeat guests and personalizes every touchpoint.

- **Automated Loyalty Points:** Accrues points per unit spent on rooms and F&B.
- **Points Redemption:** Redeem points directly for folio discounts.
- **VIP Tiers & Badges:** Silver, Gold, Platinum badges visible on Rack.
- **Stay Preferences:** High floor, quiet room, dietary allergies, and feather-free.

GUEST RETENTION

+34% Repeat Stays

ID Scanning & Police Manifests

Compliance with local hotel regulatory and security statutes.

- **Document Capture:** Stores National ID, Driver's License, or Passport.
- **Automated Pre-Fill:** Reads guest name and nationality directly.
- **Police Manifest:** 1-click export of lawful daily in-house guest manifest.
- **Risk & Blacklisting:** Flags past bad actors and chargeback offenders.

REGULATORY AUDIT

100% Lawful Compliance

F&B Operations: POS, Kitchen KDS, Bar & Tables

The complete F&B ecosystem: Waiter touchscreen, live Kitchen KDS, Bar pour tracking, and Table floorplans

Touchscreen POS & Table Floorplans

Engineered for fast-paced dining, rooftop bars, and lounges.

- **Visual Table Floorplans:** Real-time table status (Occupied, Free, Billed).
- **Guest Dining Waitlist:** Digital waitlist with SMS/WhatsApp alerts when tables are ready.
- **Charge to Room Folio:** Posts meals directly to hotel room folio with 1 tap.
- **Bill Splitting & Tabs:** Split checks by seat, item, or percentage with custom modifiers.

FLOOR EFFICIENCY

Sub-5s Check Processing

Kitchen Display System (KDS)

Replaces chaotic paper kitchen chits with live chef touchscreens.

- **Color-Coded Timers:** Green (<10m), Amber (15m), Red (>20m overdue).
- **Automatic Ticket Splitting:** Food tickets route to Kitchen; drinks route to Bar.
- **Cook Station Routing:** Grill orders to Grill screen; Salad to Cold prep screen.
- **Bump-Bar Completion:** Tap "Ready" to immediately alert floor waitstaff.

SERVICE SPEED

-35% Order Prep Time

Bar Display & Anti-Shrinkage Pour Control

Dedicated bartender display screen and liquor loss prevention.

- **Drink-Only Live Feed:** Bartenders see cocktails, beers & wines without food clutter.
- **Spirit Pour Logging:** Records exact shots and bottle depletions (e.g. 50ml pour).
- **Liquor Theft Prevention:** Reconciles POS drink sales against cellar bottle stock.
- **Minibar & Cellar Restocks:** Tracks beverage movements from central stores.

BAR PROFIT PROTECTION

Thermal Hardware & ESC/POS Printing

Native browser-to-hardware integration via WebSerial and LAN.

- **80mm & 58mm Thermal Printers:** Instant print of guest chits and kitchen orders.
- **Cash Drawer Kick:** Auto-triggers 24V drawer pop upon cash finalization.
- **Zero Cloud Drivers:** Connects directly over USB without third-party spoolers.
- **Split Kitchen Printing:** Simultaneously prints drink chit at bar and food chit at kitchen.

HARDWARE RELIABILITY

Recipe BOM Depletion & Kitchen Cost Control

Bill of Materials (BOM) engine that deducts raw ingredients in real-time as dishes are ordered

Real-Time Recipe Depletion Engine

Solves the biggest black hole in hotel profits: kitchen stock leakage and unmonitored ingredient usage.

- **Constituent BOM Mapping:** Ordering "1x Grilled Ribeye Steak" automatically deducts:
 - 350g Beef Ribeye, 20g Butter, 5ml Olive Oil, 2g Rosemary.
- **Sub-Recipe Support:** Handles complex prep bases (e.g. Tomato Marinara base used in 8 dishes).
- **Automatic Stock Shortage Warning:** POS disables or warns servers when raw ingredients are depleted.
- **Dynamic Food Cost %:** Calculates live profit margin for every dish based on current ingredient costs.

SHRINKAGE ELIMINATED

Unaccounted Kitchen Waste Drops by 85%

Kitchen Waste, Spoilage & Breakage Log

Formalizes the logging of kitchen errors, burnt steaks, expired dairy, and broken liquor bottles.

- **Reason Code Tracking:** Categorizes loss into: *Burnt/Spoiled, Expired, Spilled/Dropped, Staff Meal*.
- **Financial Impact Calculation:** Converts wasted kilograms or liters directly into dollar/naira loss.
- **Chef Accountability:** Requires head chef sign-off before inventory can be written off.
- **Yield Optimization Analytics:** Highlights which menu items suffer the highest prep scrap rate.

GROSS MARGIN IMPACT

+4.8% F&B Profit Margin Lift

Multi-Location Inventory & Automated Procurement

Central stores, outlet cellars, automated purchase orders, and supplier invoice verification

Multi-Location Stock Tracking

Isolates inventory across distinct physical stores.

- **Locations:** Central Store, Pool Bar, Main Kitchen, Cellar, Minibars.
- **Internal Stock Transfers:** Requires dual confirmation (Dispatched & Received).
- **Periodic Stocktake Audits:** Compares physical counts against book balance.
- **Variance Reporting:** Automatically highlights missing units with monetary value.

STOCK AUDITING

**100% Variance
Transparency**

Par Levels & Auto-Reorder

Never run out of champagne or ribeye during peak weekends.

- **Custom Par Levels:** Define minimum safety stock and re-order thresholds per item.
- **Automated PO Generation:** System automatically drafts Purchase Orders when stock dips.
- **Lead-Time Optimization:** Adjusts re-order points based on vendor delivery speed.
- **Stock Expiry Alerts:** First-in, first-out (FIFO) rotation alerts.

STOCKOUT PREVENTION

**Zero "86'd" Menu
Surprises**

Supplier Directory & 3-Way GRN

End-to-end purchasing governance from quote to delivery note.

- **Vendor Database:** Stores vendor price agreements, payment terms, and contacts.
- **Goods Received Note (GRN):** Storekeeper logs items received at the loading dock.
- **Price Variance Protection:** Flags if vendor invoice price exceeds agreed PO rate.
- **Accounts Payable Sync:** Bridges verified deliveries directly into hotel accounts.

PURCHASING CONTROL

Eliminates Over-Invoicing

Standout Moat: Dynamic Virtual Accounts (DVA)

Eliminating fake transfer receipts and receptionist fraud with instant bank transfer reconciliation

In emerging and high-growth markets, over **70% of hotel payments** occur via direct bank transfers. Conventional hotels waste 15–45 minutes waiting for receptionists to verify SMS alerts or login to banking apps—frequently falling victim to **fake receipt fraud**.

How HospitalityOS Reconciles in < 3 Seconds:

- **Dedicated 10-Digit NUBAN:** Every booking gets a unique temporary virtual bank account.
- **Zero Terminal Reliability Issues:** Works when POS card machines fail or network is down.
- **Instant Webhook Capture:** Bank transfers trigger immediate webhook to the PMS.
- **Auto-Confirm HELD Bookings:** Automatically confirms room and issues WhatsApp receipt.

1 Guest Receives Account

WhatsApp or Desk displays: *Providus / Moniepoint Bank · 9928172910 · "Grand Hotel - Mr. Ade (Res #82A)"*

2 Guest Transfers via Any Banking App

Guest sends exact balance from GTBank, Zenith, Kuda, etc. via standard instant NIP transfer.

3 3-Second Instant Auto-Reconciliation

Folio balance drops to \$0.00, keycard unlocks, and instant WhatsApp confirmation is dispatched.

Unified Guest Folios & Multi-Currency FX Engine

Centralized billing ledger capturing all room, dining, spa, and laundry charges into a single statement

Unified Single-Folio Ledger

Aggregates every dollar spent on the property into one master bill.

- **Real-Time Cross Posting:** Cocktails, laundry, and room service post instantly.
- **Split Billing:** Split room charge to corporate master, and minibar to guest personal card.
- **Security Deposits:** Pre-authorizes damage deposits and refunds automatically on checkout.
- **Itemized PDF Invoices:** Instant WhatsApp and email dispatch on departure.

LOST REVENUE

Zero Unposted Post-Stay Chits

Multi-Currency FX Engine

Seamless billing in USD, EUR, GBP, and local currency (NGN, KES, GHS).

- **Live Central Bank Exchange Rates:** Auto-updates or allows locked custom hotel rates.
- **Dual-Currency Folios:** Displays invoice in both USD and local currency simultaneously.
- **Foreign Cash Payments:** Accepts crisp USD/EUR notes with precise local change calculation.
- **FX Gain/Loss Accounting:** Automatically calculates currency gain or loss for accounting.

INTERNATIONAL READY

Zero FX Calculation Errors

Automated Tax, VAT & Levies

Automated tax compliance preventing penalties and audit surprises.

- **Configurable Rules:** 7.5% VAT, 5% Tourism Consumption Tax, 10% Service Charge.
- **Exemption Tagging:** Auto-exempts diplomatic or NGO accounts with proper tax IDs.
- **Tax Summary Exports:** One-click monthly returns for State Internal Revenue Services.
- **Fiscal Compliance Ready:** Compatible with digital electronic signature devices.

TAX COMPLIANCE

100% Audit-Proof Tax Logs

Automated Night Audit & Yield Management

Replacing 3 hours of late-night manual paper reconciliation with a 60-second automated system roll

1-Click Automated Night Audit

Batch executes at midnight without locking out front desk staff.

- **Automatic Room Rate Posting:** Posts room & tax charges across all in-house folios.
- **No-Show Auto Processing:** Releases unconfirmed holds and posts no-show fees.
- **Department Balance Roll:** Closes day's ledgers and advances hotel business date.
- **Auditor PDF Dossier:** Generates manager's daily flash report automatically.

AUDITOR TIME SAVED

**From 3 Hours → 60
Seconds**

Dynamic Rates & Yield Rules

Algorithms that maximize RevPAR based on demand curves.

- **Occupancy-Triggered Pricing:** Increases room rates by 15% when occupancy > 80%.
- **Day-of-Week Rules:** Different weekend leisure vs. weekday corporate rate plans.
- **Minimum Length of Stay (MLOS):** Requires 2-night minimum on festive/holiday dates.
- **Package Bundling:** Bundles Bed & Breakfast, Airport Shuttle, or Romantic Dinner.

REVENUE OPTIMIZATION

+14.2% Average RevPAR

Promotions & Flash Campaigns

Targeted marketing promotions engine for direct bookings.

- **Custom Promo Codes:** "SUMMER20", "WEDDING50", "CORPEXECUTIVE".
- **Discount Controls:** Percentage discounts, fixed amount off, or free extra night.
- **Usage Caps:** Limits promotions to the first 50 bookings to protect yield.
- **Blackout Date Restrictions:** Blocks promo codes during high-demand holidays.

DIRECT CONVERSIONS

+32% Campaign Bookings

2-Way OTA Channel Manager (Booking.com & Airbnb)

Centralized pool of inventory synchronizing rates, availability, and bookings across global OTAs

Real-Time 2-Way Synchronization

No more manual extranet logins or double-booking nightmares.

- **Pooled Inventory Engine:** When a room is booked directly at Front Desk or on WhatsApp, inventory drops instantly on Booking.com, Airbnb, and Expedia.
- **Zero Double-Bookings:** Closes dates across all external channels in milliseconds.
- **Rate & Restriction Parity:** Update prices once on HospitalityOS → pushes to all OTAs.
- **Direct-Channel Preference:** Allows holding back select premium suites exclusively for direct guests.

OPERATIONAL PEACE OF MIND

100% Elimination of Double-Bookings

Supported OTAs & Direct Channel Savings

Integrated channel protocols designed for global and regional reach.

- **Supported Gateways:** Booking.com, Airbnb, Agoda, Expedia, HotelTonight, and custom iCal feeds.
- **Automated Folio Ingestion:** Incoming OTA bookings auto-populate guest name, payout amount, and commission cut.
- **Commission Leakage Analysis:** Compares net revenue earned from OTAs vs. direct web bookings.
- **Automated Re-engagement:** Turns departing OTA guests into direct-bookers for their next stay.

COST SAVINGS

Saves \$1,200+ Monthly in OTA Commissions

Energy, Generator & Diesel CPOR Intelligence

Stopping fuel theft and calculating the exact utility Cost Per Occupied Room (CPOR)

Real-Time Diesel CPOR

Tracks your single largest operating cost against room revenue.

DIESEL CPOR FORMULA:
(Total Diesel Spent) ÷ Occupied Rooms

- Calculates exact utility cost incurred to host each guest night.
- Enables accurate room pricing that guarantees profit margins.

MARGIN PRECISION

Exact Fuel Cost Per Room

Fuel Theft & Leak Alerts

Automated anomaly detection catching fuel siphon theft and faults.

- **Burn-Rate Profiling:** Compares logged generator run-hours against expected baseline (e.g. 35 L/hr).
- **Siphon Interception:** Flags immediate alert when fuel drop exceeds generator running hours.
- **Run-Meter Tamper Protection:** Enforces sequential hour-meter logs with validation.

THEFT INTERCEPTION

Stops Up to 3,000L Fuel Siphon

Preventive Maintenance Log

Prevents catastrophic generator breakdowns during peak occupancy.

- **Hour-Triggered Servicing:** Oil, filter, and belt alerts at 250 and 500 operating hours.
- **Fuel Replenishment Audit:** Tracks vendor delivery volume, price per liter, and dipstick tests.
- **Audit Logbook:** Immutable digital service history for hotel owners and asset valuers.

EQUIPMENT LIFESPAN

+4 Years Generator Life

24/7 WhatsApp AI Guest Concierge (Claude-Powered)

Zero guest app downloads required. Fully autonomous guest ordering, booking, and requests

Guests refuse to download proprietary hotel apps. With HospitalityOS, the entire hotel concierge runs natively inside **WhatsApp**—the app every traveler already uses.

Capabilities Built Into WhatsApp:

- **Room Service Orders:** Guest types *"Send a club sandwich & coke to Room 304"* → orders post to KDS & folio automatically.
- **Housekeeping Requests:** *"We need 2 extra bath towels"* → dispatches instant mobile task to floor attendant.
- **Autonomous Upselling:** Suggests late checkouts (+\$30) and spa treatments during stay.
- **Strict Safety Boundaries:** Never hallucinates rates or discounts; seamlessly escalates complex requests to human front desk.

💬 LIVE GUEST INTERACTION SIMULATION:

Guest: Hi, what time does the rooftop pool close tonight? Also can we get fresh towels?

AI Concierge: Good evening Mr. Ade! The rooftop pool is open until 10:00 PM tonight. 🏊

I have notified housekeeping to deliver 2 fresh towels to Room 304 right away. Would you also like a complimentary cocktail from our Happy Hour menu?

Guest: Yes please, send a Mojito!

AI Concierge: Done! 1x Classic Mojito (\$12) ordered from the Pool Bar and charged to Room 304 folio. Our bartender is preparing it now! 🍹

Smart Reputation Shield & Review Funnel

Intercepting disgruntled guests before they post on Google, while driving happy guests to 5–star public reviews

A single 1–star review on Google Maps or TripAdvisor can cost a hotel tens of thousands of dollars in lost corporate bookings. HospitalityOS creates an automated **sentiment firewall** immediately post-checkout.

How the Reputation Shield Works:

- **Automated Checkout Survey:** Exactly 45 minutes after checkout, guest receives a polite 1–tap rating via WhatsApp.
- **High Ratings (4–5 Stars):** Instantly routed with a one–tap link directly to hotel's Google Maps & TripAdvisor pages.
- **Low Ratings (1–3 Stars):** Intercepted privately inside HospitalityOS. Prompts guest to describe what went wrong.
- **Immediate GM Escalation:** Opens an urgent resolution ticket for the General Manager to call the guest before public venting occurs.

★★★★★ Rated 4 or 5 Stars

PUBLIC BOOST

System sends: *"Thank you so much! Would you mind tapping here to share your great experience on Google? It takes just 15 seconds!"*

Result: Rapid increase in verified 5–star Google reviews.

★ Rated 1, 2, or 3 Stars

PRIVATE INTERCEPT

System sends: *"We are truly sorry your stay wasn't perfect. Please reply with details so our GM can reach out directly."*

Result: Problem resolved privately. Negative review averted.

The "AI General Manager" Conversational BI

Hotel owners can interrogate their entire property database in plain English via WhatsApp or Web

Plain English Data Queries

Zero complex spreadsheets or learning curves.

- "What was our RevPAR and ADR last weekend?"
- "Did diesel consumption exceed baseline yesterday?"
- "Which room category generated highest net profit this month?"
- "Show me uncollected receivables from corporate clients."

EXECUTIVE ACCESS

**Instant Answers
Anywhere**

Automated Morning Briefing

Pushes summary to Owner's WhatsApp at 7:00 AM daily.

- **Occupancy & ADR:** Yesterday's closed performance vs. target.
- **F&B Gross Revenue:** Restaurant & Bar daily totals.
- **Cash In Hand:** Verified till balances across all cash desks.
- **Anomalies:** Highlights refunds, voids, or diesel spikes.

MORNING INSIGHT

Zero Manual Compilation

Executive Analytics Suite

Comprehensive visual dashboards for C-suite and investors.

- **Industry KPIs:** RevPAR, TrevPAR, ADR, GOPPAR, Occupancy %.
- **Departmental P&L:** Rooms, Dining, Bar, Laundry, and Utilities.
- **Channel Performance:** Direct vs. OTA revenue splits.
- **Year-over-Year Growth:** Compare seasons with historical trends.

FINANCIAL CLARITY

Institutional-Grade BI

Offline-First Resilience & Immutable Audit Trails

Engineered for real-world infrastructure: 100% operational during internet dropouts and power cuts

Offline-First Synchronization Engine

Most cloud PMS platforms freeze completely when the fiber cable is cut or network drops. HospitalityOS continues uninterrupted.

- **IndexedDB Local Browser Mirroring:** Check-ins, room moves, and bar orders continue locally without internet connection.
- **Offline Transaction Queue:** Transactions queue locally in encrypted browser storage.
- **Deterministic Two-Way Sync:** When connectivity restores, engine merges changes into PostgreSQL server automatically.
- **Conflict Resolution Rules:** Timestamped deterministic logic prevents data collision.

FRONT DESK UPTIME

100% Business Continuity

Immutable Audit Trail & Bank Security

Tamper-evident operational logging that leaves dishonest actors with nowhere to hide.

- **Immutable Audit Records:** Every single room rate modification, discount, payment deletion, or void is permanently recorded.
- **User Attribution & IP Tracking:** Logs exact user ID, role, workstation, and timestamp for every keystroke.
- **Role-Based Access Control (RBAC):** Granular permissions prevent unauthorized ledger alterations.
- **Bank-Grade Encryption:** TLS in transit, AES-256 at rest, with strict GDPR guest privacy compliance.

AUDITOR READY

100% Forensic Audit Logs

Flexible Subscription Plans & 14-Day Free Trial
